# Innovation Project

## **Innovation Project is based on a yearly theme**

**2024-25 SUBMERGED** – Solve a problem related to ocean exploration

**2020-21 RePlay Season** - Help people get more active

**2017-18 Hydrodynamics Season** - Improve the way people find, transport, use, or dispose of water

**2014-15 World Class** – Improve the way we learn something

# Innovation Project Overview

**Identify** a real-world problem within the overall theme

**Research** and identify existing solutions

**Design** new solutions or improve an existing one in some way

**Create** a prototype or model for the solution

**Share** the solution with others

**Iterate** the design using feedback/testing

**Communicate** your ideas to judges in a 5-min presentation

## Sample Project (SUBMERGED)

### PROBLEM:

- Marine biologists and experts find sampling and carrying seafloor sediments (20 - 40 m) to be difficult
- Embedding the corers is hard, even sometimes having to use small hammers to do it
- They must be kept in a vertical position to not mix the different layers of collected samples

### EXISTING SOLUTIONS

- Baskets to transfer corers vertically must be carried by hand
- Nets to store the corers can still tip over.
- In both cases, balloons can be used to lift samples to the surface, although they must be inflated with air from the diver's tank and their pressure needs to be controlled while ascending

## Sample Project (SUBMERGED)

### SOLUTION: ScuBasket

Basket that holds 6 corers that descends to the seafloor and comes back up on its own.

1. An inflatable connected to a small CO<sub>2</sub> bottle activated by the diver, with an automatic valve controlled by pressure.
2. A ballast to control the buoyancy and stability of the corers in vertical position.
3. Each corer has a screw-like shape to make the insertion into the seafloor easier, using a hand crank.

# Robot Game

## Overview

- 4ft x 8ft table with a mat
- LEGO-based missions
- LEGO MINDSTORMS or SPIKE Prime to solve the missions
- Theme changes yearly
- 2 tables placed next to each other at competition

## Robot Runs

- 3 matches, best score counts
- 2.5 minutes to complete as many missions as you can (Note: majority of teams will not do all the missions)
- Points vary by mission
- Each mission has its own set of rules and instructions
- Referees score you at the end of each match using a scoresheet
