

Building Mission Models

for *FIRST* LEGO League Challenge

Getting Organized

Sort Your Bags by Number

For the MASTERPIECE season,
you should find the following
items in your Challenge set box

Bag #1 - 2	Bag #10 - 2
Bag #2 - 2	Bag #11 - 1
Bag #3 - 2	Bag #12 - 1
Bag #4 - 2	Bag #13 - 1
Bag #5 - 2	Bag #14 - 1
Bag #6 - 3	Bag #15 - 1
Bag #7 - 1	2 unnumbered bags
Bag #8 - 2	2 loose black axles
Bag #9 - 1	1 sheet of 3M dual lock

1 rolled up challenge mat

Open and Sort by Number

- Open only one set of numbered bags at a time. E.g. all bag number 1s
- There can be multiple bags with the same number (See Slide 3 to check how many there should be)
- Building instructions are by bag number.

Bag Number
Element Overview
Prepack Overview
Bag 1
Bag 2
Bag 3
Bag 4
Bag 5

Sorting Can Save You Time

- Sort the parts in each bag into general part types so that they are easier to find (axles, liftarms, frames, pins, etc.)
- You can use LEGO sorting trays, paper plates, small bowls, box lids, trays, etc.
- This step will help find the right part you as you build

Elements in Bag 3 sorted before building

**Building
Efficiently and
Reliably**

Build in Pairs

- Building in pairs or small groups works well.
- One person finds the parts for the step, one person puts the pieces together, and one person checks to make sure the step was done correctly.
- Change roles every few steps.

Multiplier Symbols

- Be sure to pay attention to the multiplier symbols (e.g. X2, X4) symbols at the start of a subset of instructions.
- You can save time by constructing them simultaneously.
- In MASTERPIECE, sometimes the multiplier symbol only shows up after you have built one copy.

Follow the Instructions

- Take your time and always build exactly what the instructions tell you.
- Do not improvise or “improve” the model.
- Your model must look like and behave exactly the same way as the ones at the competition.

Check Your Work

- Have your coach or adult check the build or compare with another team's set if needed.
- Be careful and use the right part in the right step
- Common mistakes include:
 - Using the wrong length liftarm in a step (e.g. 11M instead of a 13M liftarm)
 - Using the wrong pin (friction vs. frictionless)

E.g. Using a black friction pin instead of a frictionless pin in this step will change how the model operates

Some Models Take Longer to Build

- When splitting up the work, note that some models and bag numbers take a lot longer to complete than others.
- You can check ahead and see how many step numbers are in each build instruction and/or refer to this table with approximate build times for the MASTERPIECE season.

Bag No.	Time	Bag No.	Time
1	16mins	8	15 mins
2	20 mins	9	13 mins
3	30 mins	10	21 mins
4	6 mins	11	13 mins
5	20 mins	12	10 mins
6	35 mins	13	7 mins
7	15 mins	14	1 min

Unnumbered Bags

- Larger elements such as hoses, long axles, large frames, and 13M/15M beams are just loose in the box or in unnumbered bags. (M = LEGO Modules)
- Check the top of the instructions page for parts needed before you begin.
- **If you are trying to presort by mission model so that a student can take elements home and build, be sure you look for all the larger items in the unnumbered bags or loose items at the bottom of the box.**

**6 Elements in Unnumbered Bags
+ 2 Loose Items (black axles)
+ Everything in Bag 10**

Flip Symbol

- The model sometimes requires flipping before the next element is added. Check before you add the pins/next element

Arrows

- Sometimes instructions have arrows or show where one element is added.
- However, pay attention to how many items are in the blue box and look for them in the image.
- Pay attention to which pins/holes you need to use. It is easy to put a peg in the wrong hole.
- Sometimes there is no arrow indicator, but if you look closely, elements were added in the step.

11

In Step 11 you can see an arrow for 1 pin. However another pin was also added in this step

Setting Up the Mat

Setting up the Challenge Mat

- Placement of the challenge mat is a very important step before placing the models on it.
- The rules for placement can vary every year (Check the Robot Game Rulebook and see image on right)
- The instructions will tell you how far East-to-West and North-to-South the mat should be placed relative to the table.

Field Mat Placement

1. Check the table surface for bumps. Sand or file them away and then vacuum well.
2. On the vacuumed table only, unroll and place the mat as shown below. Never fold the mat, and never crush or bend a rolled mat.
3. Slide the mat against the bottom border wall and align it centrally. There should be no gaps except for one at

the top wall of about 1/4 in. (6 mm). When table size and mat placement are correct, the areas to the left and right of the mat each measure about $X = 6.75$ in. by $Y = 45$ in. (171 mm by 1,143 mm).

4. Optional – To hold the mat in place, you can use thin strips of black tape, covering only the mat's left and right borders.

Practice setup

Tournament setup

Setting up the Models

- Place finished models loosely on the challenge mat.
- Be sure to follow the text and images in the Field Setup section of the Robot Game Rulebook very carefully. They will tell you which way a model should face.
- Use the markings on the challenge mat itself as alignment points. If it doesn't align, it is probably an indication of something wrong with the build itself.

Watch: <https://youtu.be/m6L7fs3mu9w>

Pressing Models into Place

- Once everything looks correct, follow the set-up instructions to place the dual-lock (square with X) on the Challenge mat as shown in the Robot Game Rulebook.
- Press the models down in place holding and pressing as close to the dual lock as possible.
- Not all models will need to be dual-locked. Some will stay loose on the markings on the mat.

3M™ DUAL LOCK™ RECLOSABLE FASTENER PLACEMENT

You will find sheets of Dual Lock™ squares in your Challenge set to secure the models to the mat. Dual Lock is an important part of field setup. If the models are not secured properly, you will have difficulty completing the missions.

SECURING MODELS – The squares on the mat with the X inside show where to apply the Dual Lock. Use the Dual Lock as shown in this example and be very exact. When pressing down a model, press on its base instead of pressing from higher up, which might crush the model. To remove the model from the mat, lift it from its base to separate the Dual Lock.

Watch: <https://youtu.be/m6L7fs3mu9w>

Packing Away Models

- You can pack up and put away your challenge set if you need to. The models are generally very durable
- Remove models from as close to the dual lock as possible.
- One side of the dual lock should come off with the model. The other side stays on the mat.
- Place all smaller items such as minifigures in ziplock bags so that you do not lose the accessories

Common Questions and Issues

Leftovers

- There are always some small leftover elements
- The image on the right shows all the leftover elements once you have placed all your models on the mat
- There should be no large elements left over
- Bag 4 of MASTERPIECE contains a lot of extra LEGO bricks that are used in Mission 04 (MASTERPIECE)

No Build Instructions

- No build instructions for a bag number simply means the bricks are used in some other way
- Bag 15 contains team souvenirs (badges, tiles and precision tokens)
- See next slide for instructions

2

3

Missing Items

- It is very uncommon to be missing a LEGO element or a whole bag.
- Can't find a small part?
 - Check the bags, check the ground, and check to see that the element was not used earlier in another step by mistake.
- Can't find the Dual-lock?
 - Check the box again - it tends to blend in with the cardboard
- Can't find a larger item?
 - Check the unnumbered bags or bottom of the box.

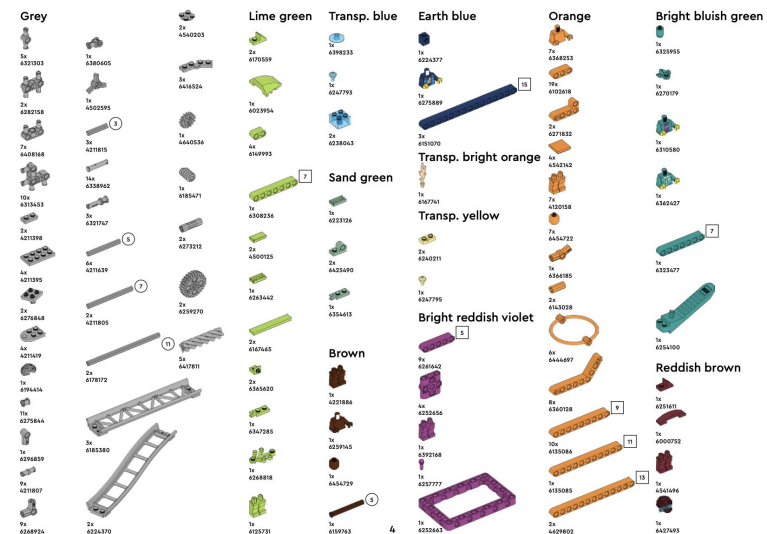

To prevent losing elements, make sure that you empty the bags of LEGO on to a tray or container of some kind rather than on the floor or table.

Missing Items

- If you really can't find an item, call LEGO for help: 1-800-422-5346 (USA/CAN) or 00800 5346 5555 (International), You can also visit the missing parts/customer service page of the LEGO website
- You will need to know the set number (45823) and the part you need. The Element Overview document in the Building Instructions section will tell you the part number.
